New technologies,
strong brands,
real innovation.

Be-connected with the future of
injection moulding at K 2025.

K 2025
8-15 OCTOBER

Be connected with the future of injection moulding – our motto for K 2025. Together with WINTEC, we at ENGEL show how you can continue to be successful in the future: with bold ideas, artificial intelligence and completely new technologies that not only inspire today, but also take you to the top tomorrow.

Artificial intelligence and digital assistants

With data on the autonomous injection molding solution.

Artificial intelligence is revolutionizing plastics processing. Digital assistants and AI-supported solutions not only optimize process control, reduce waste and make operation easier – they are also increasingly making the vision of the autonomous injection molding machine a reality.

Real innovation in mechanical engineering

Technology that makes the difference.

At K2025, we will be presenting a machine concept that sets new standards: energy-efficient, space-saving and with maximum freedom for your production.

Technologie and solution provider for every industry

Solutions that fit your industry.

Whether automotive, packaging, medical or contract manufacturing – you need tailor-made systems that optimize your processes and are future-proof. At K 2025, discover solutions that are precisely tailored to your requirements.
