Oerlikon HRSflow, a worldwide reliable partner

More than

- 16.000 Systems delivered in 2023
- 2.700 Customers
- 1.800 End Users
- 250 Designers in 11 countries

Our Mission

Oerlikon strives to be your most reliable business partner, worldwide. We increase value through high-quality innovative industrial solutions, continuously. We engage highly qualified professionals. Our commitment is your success!

Our Vision

Oerlikon creates innovative industrial solutions for a better life

Our Values

- Integrity: everything we build, we build on trust.
- Team Spirit: I care about the team, the team cares about me.
- Excellence: what we do, we do best.
- Innovation: ideas come from everybody and from everywhere in the organization.

Planet and people play a central role in our activities

Environmental value

All our strategies, technologies, equipment and production activities respect and safeguard the environment, due to the awareness that it is a fundamental duty for companies acting in a world with limited resources

Economic Value

Driven by transparency, every year we publicly share our Company Data and our decisions through our Sustainability Report.

Social value

We have shared strategies and objectives at all company levels and in all geographical areas, while maintaining a local management of resources in order to best meet the needs of our customers in the area

Why customers choose Oerlikon HRSflow

We are **technology pioneers**. Innovation is our drive, but the team is our power.

High-quality expertise and a shared commitment to achieve corporate and customer goals, with the **same standards everywhere** in the world.

A partner with **knowledge of injection molding** processes and a **technical service always available** in order to provide solutions, ensuring performance.

These are the reasons to choose us, which make us much more than just a Hot Runner supplier.

Global with a local approach

Our widespread presence allows us to achieve the best lead time.

Thanks to our global structure with 3 production plants and more than 50 sales / service centers worldwide, we can support customers with 24/7 technical service.

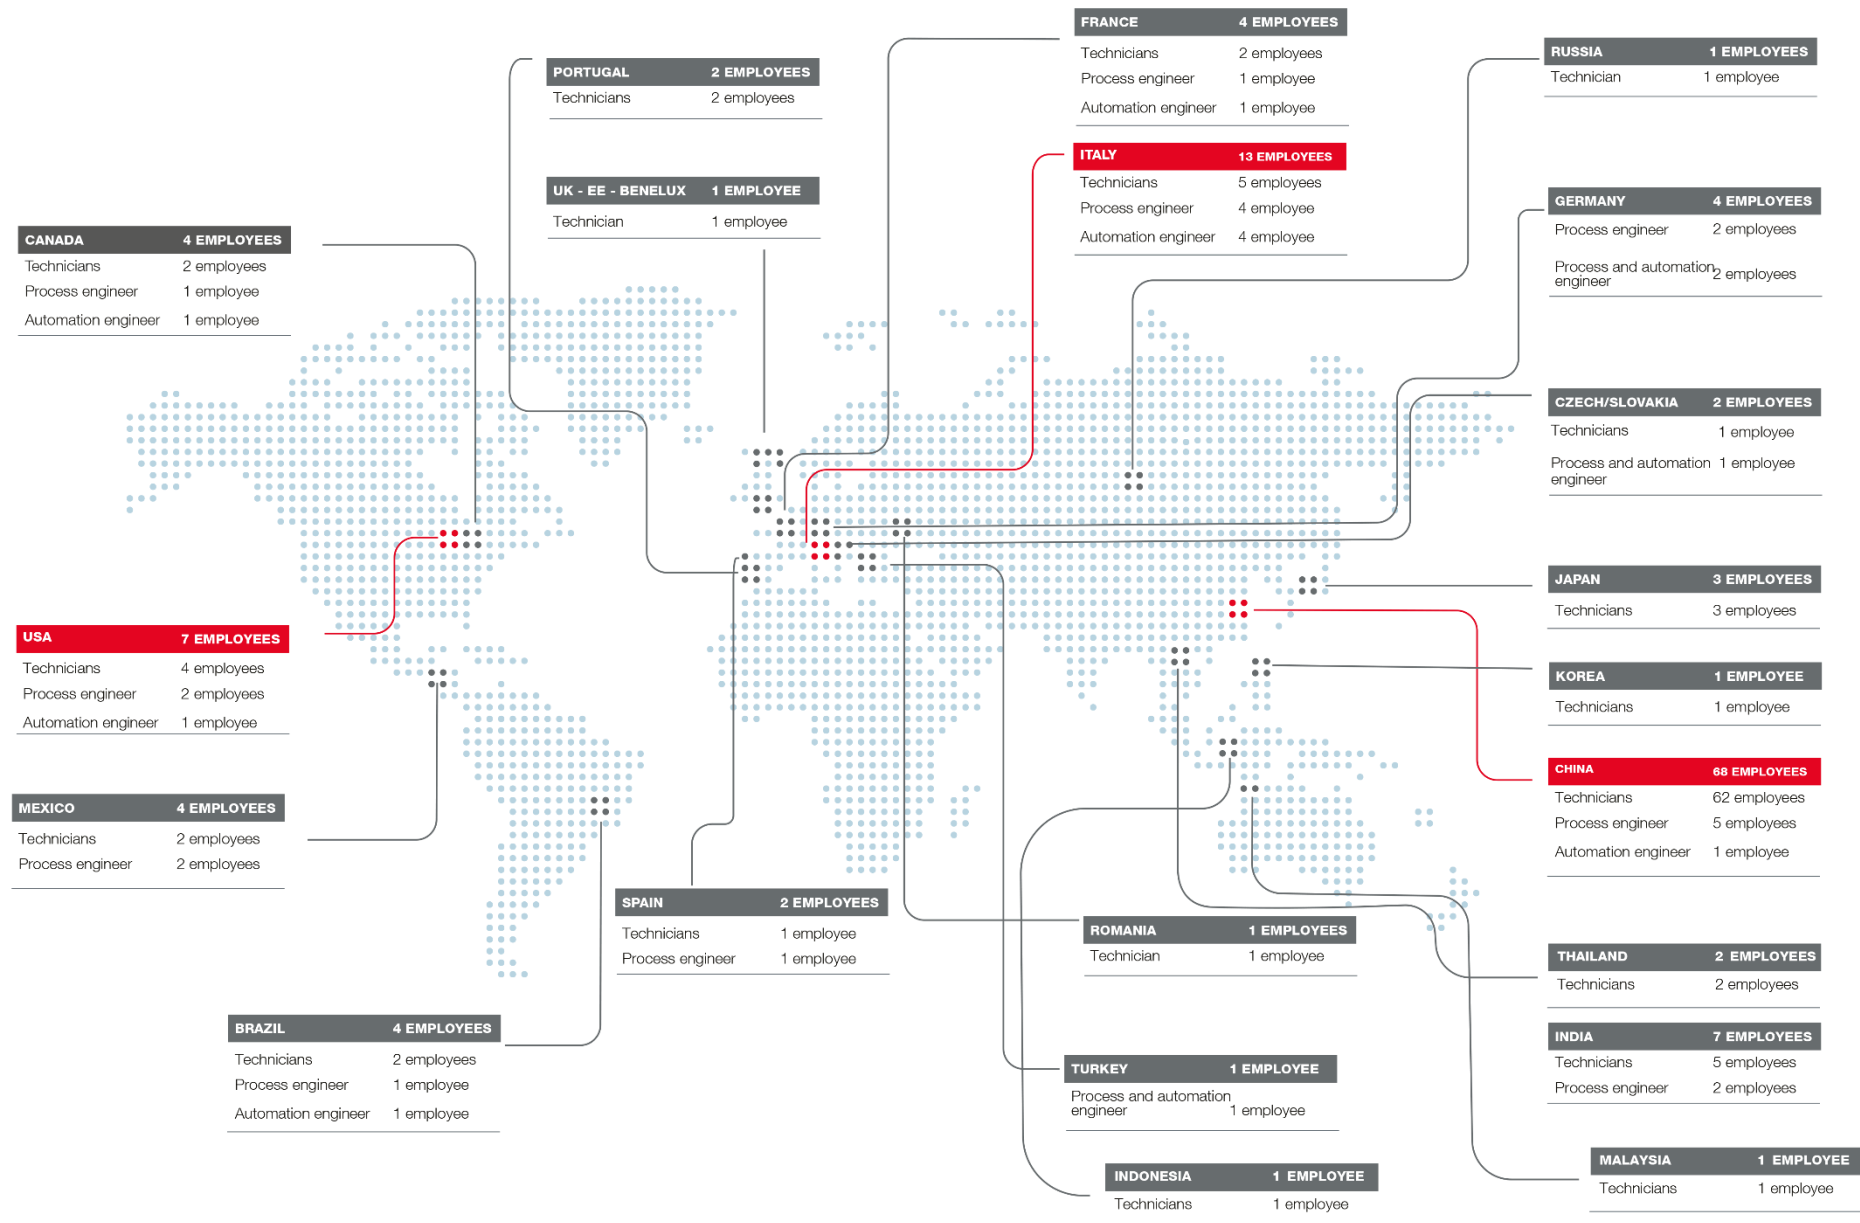

Our global design, production and quality procedures - identical wherever they are in the world - match perfectly with localized service in order to meet the needs of each country.

Our worldwide presence

- 3 production plants (Europe, America, Asia)
- 1035 employees worldwide
- 52 branches worldwide

Machines, raw materials and utilities

QUALITY MANAGEMENT

Equipment and procedures

- In each of our production plant in Italy, US and China there are robots and automated lines which run 24/7, to ensure a more precise, reliable and stable production process.
- Our production performances are the same around the world, since **our factories boast identical equipment and standard processes.**
- Our **design, production and quality procedures are identical**, wherever they are located.

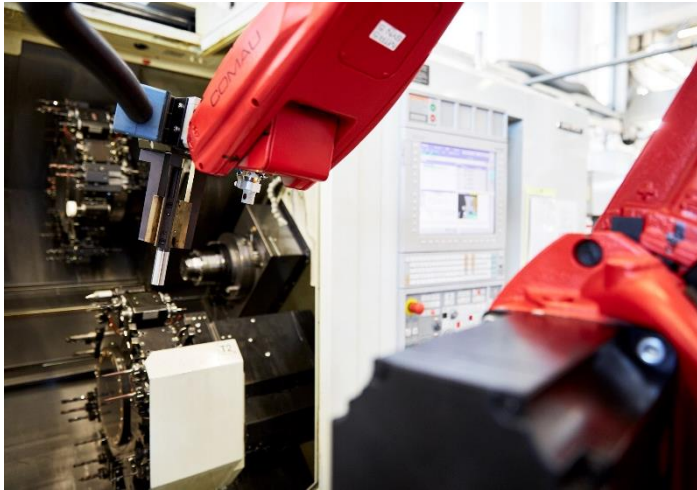

Our quality control

Sales, Design, Production, Testing and Installation processes are all quality controlled and effectiveness proved through:

- Digital workflow
- Optical, laser and touch control
- Data Analysis for statistical process control
- Digital data exchange
- Shared method worldwide
- High precision hot runner components with very tight tolerances.

Oerlikon HRSflow verticalized production

- In house components engineering and production
- Digital workflow (paperless)
- Pick to light approach in the assembling line
- Machines available 7/7 h24
- Fully autonomous machines
- Just in time production

Thank you.
